WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:-

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

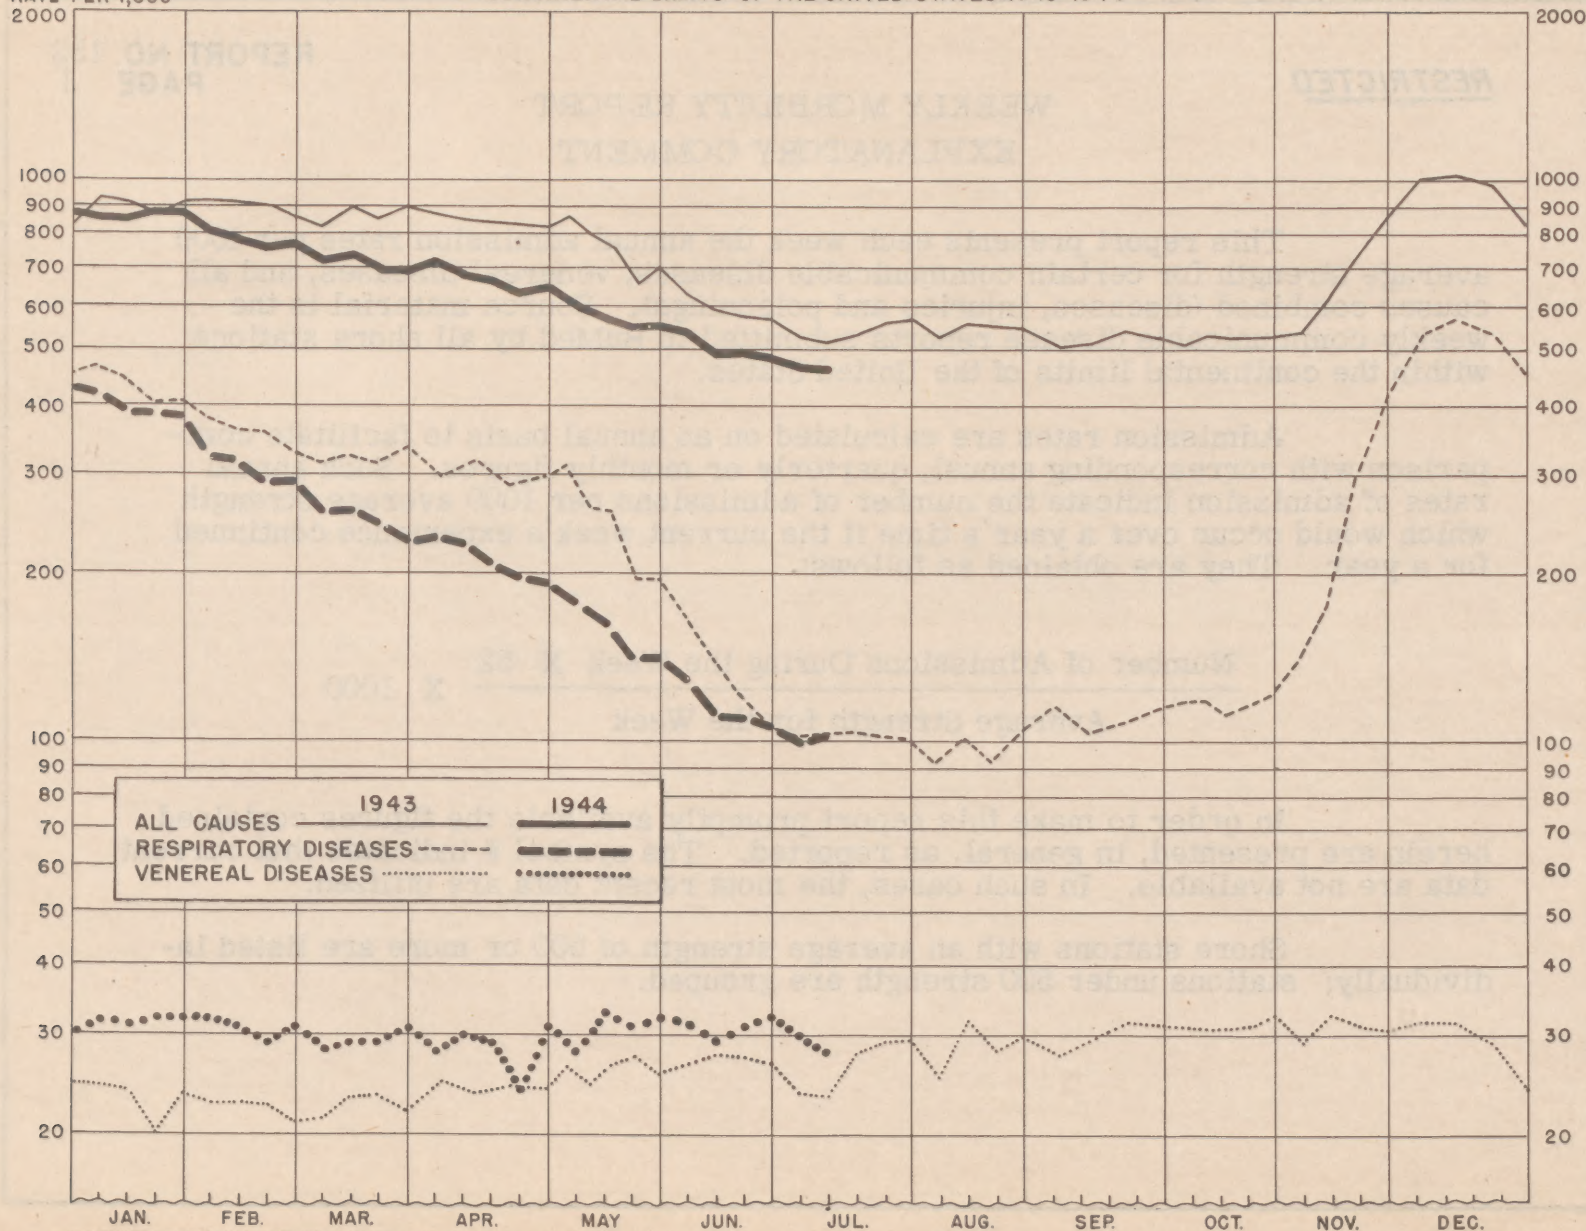

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES,* VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 132
PAGE 2

RATE PER 1,000
2000

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 8 Jul 1944

The admission rate for All Causes fell again this week. The curve stands well below the 1943 curve for the corresponding period. The highest rate (844) was reported for the Potomac and Severn River Commands, the lowest (361) for the 8th District.

The downward trend in the respiratory disease curve halted this week and a slight rise was recorded. The curve turned up in all Districts except the 1st, 5th, 7th, 8th, 11th, and Potomac and Severn River Commands. The 13th District reported the highest rate (182), the 12th District the lowest.

The venereal disease curve dropped again this week. The curve continues, however, above the 1943 curve for the corresponding period. The highest rate (38) was reported for the 4th District, the lowest rate (18) for the 9th District.

Influenza and Catarrhal Fever. The downward trend in the curve for these infections has flattened out for the past four weeks and this week rose slightly. The curve stands well below the 1943 curve for the corresponding period. The highest rate (107.51) was reported for the 13th District, the lowest rate (48.60) for the 8th District.

Pneumonia--Broncho and Lobar. The rate for these infections was reported again at 1. The curve stands well below both the 1942 and the 1943 curve for the corresponding period. The 13th District reported the highest rate (6); the 4th, 6th, and 12th Districts and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. For the eighth consecutive week the atypical pneumonia rate has been reported at 2. The curve continues to stand well above the 1943 curve for the corresponding period. The highest rate (6) was reported from the 8th District. The 1st and 13th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS--CONTD.

Tonsillitis and Pharyngitis, Acute. The downward trend in the curve for these infections flattened out this week and the rate was reported again at 31. The Potomac and Severn River Commands reported the highest rate (76), the 7th District the lowest rate (13).

Rheumatic Fever, Acute. For the fifth consecutive week the rate for this infection has stood at 2, which is identical with the rate reported for the corresponding week of 1943. The 13th District reported the highest rate (8). The 4th, 6th, and 8th Districts reported no cases.

Scarlet Fever. The scarlet fever rate was reported again at 2 which compares favorably with the rate of 3 for the corresponding week of 1943. The only high rate (29) was reported from the 13th District. Of the 57 cases reported from the 13th District 53 were from the Naval Training Center at Farragut, Idaho. Only six Districts reported any cases and of these only the 13th District reported a rate over 2.

Cerebrospinal Fever, Meningococci. Though the rate for this infection rose this week to 0.12 the curve continues to stand below the 1943 curve. In only the 5th, 9th, and 11th Districts were cases reported. The trend has been generally downward since the beginning of the year.

Malaria. For the ninth consecutive week the malaria rate has been reported at 2. This compares favorably with a rate of 2.6 for the corresponding week of 1943. For the past 8 weeks the 1944 curve has stood below the 1943 curve for the corresponding period. The highest rate (3) was reported for the 1st and 13th Districts. No cases were reported from the 7th District.

Measles. The rate for measles continued at 2. This compares unfavorably with a rate of 1.1 for the corresponding week of 1943 but in general the 1944 curve has stood below the 1943 curve for the corresponding period. The highest rate (5) was reported for the 11th District. The 1st, 4th, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.
